S 4/2 What these people want isn't relevant to the people keeping the records. Viewed as interesting + means to an end. Callous, bureaucratic fail to a lot of operation. Clinical, detached, a-motional

Approved For Release 2000/08/09 : CIA-RDP96-00789R003700500002-5
concrete structure w/ small regular windows, maybe barred, fairly surrounded by chain link fence w/ barbed-wire top + lights. old

2nd floor has long hall, green floors, person at desk controlling access to one area. Offices. Room containing many files. Records deal w/ people present at site. 2 overall groups - subject, + others produce + keep records. Records keep track + progress of subjects individually show progress + regress during procedures, until final termination when subjects are either "dead" or "farmed out" to a holding area where they stay indefinitely (like being in retirement, a nursing home, + a mental hosp. all in one.) Subject never leave system altogether.

Procedures involve energy introduction to subject, which either incidentally or intentionally causes pain. Observers / record makers except this, are not hurried or cruel, but are also not benevolent or empathetic; they are detached, interested,
